

## **Atempo Digital Archive 3.2 Service Pack 8 Release – February 13, 2011**

We have released a new service pack for **Atempo Digital Archive 3.2 (3.2.8.9)** that delivers the following important features to ADA customers:

- **New ADA Server and Agent for MAC OS 10.7**
- Evolution of the AMM CLI used to “scratch” media or list media move
- New method to **deploy the HSM Client through GPO**
- Evolution to the ada\_pax command for MAC OS X
- Fix for the **ACSLs support on Windows form AMM/ADA**
- ...
- And more including various bug fixes – check the Release Note (RN) for details.

**Important:** For Atempo Digital Archive 3.2 SP8, the ADA Server and Agent are available on the following platforms:

- Windows
- Linux
- Mac OS X 10.5, 10.6 and 10.7
- Sparc Solaris

For HP and AIX support of all components use the previous 3.2 SP7 release.  
The Atempo Digital Archive Administration Console and the Atempo Digital Archive User Interface are available for the following platforms:

- Windows
- Mac OS X

For the JAVA User Interfaces, use the previous 3.2 SP7 release.

For more information on the fixes in this release, please check the Release Note published in the documentation area of the Atempo Support Web site or contact the Atempo Support Team at [support@atempo.com](mailto:support@atempo.com).

Important Notice: if upgrading a customer using the HSM Filter Driver – please read the release note carefully.

The compatibility guide is available at:
