

Tina delivers robust & flexible data protection service for the University of Savoie Mont Blanc

66

“New projects are created during the year by the science laboratories and teaching departments. For each project, the IT department ascertains how many servers are needed, and the data capacity involved. Being able to adapt our systems and provide secure backup services is vital. Tina is an effective, flexible solution that gives us the means to effectively deal with this critical and sensitive issue.”

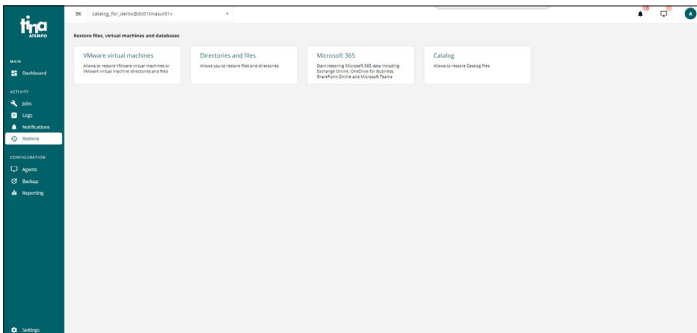

99

Bruno Guibert, Director of Information Systems, University of Savoie-Mont Blanc

THE UNIVERSITY

Savoie-Mont Blanc University is a public institution that teaches a wide range of subjects, from foreign languages to IT, and from law to business management to social and natural sciences.

The university has **four separate campuses**, 1,200 employees and lecturers, and 13,000 students. In addition to teaching, there are **19 research laboratories**, four of which are graded as excellent. Its IT department is part of **Grenoble Academy’s** joint IT service for the university.

THE CHALLENGES

When Bruno Guibert joined the University, there was already a backup solution in place, but it was not performing satisfactorily. There were difficulties **expanding** when a science laboratory had a new project that needed new **IT infrastructure** with additional **data security**. Technicians could not install the components needed for backup. They had to obtain licenses first, through a lengthy budget and ordering processes.

Costs rose constantly, becoming unbearable for the university budget. As a consequence, some projects were running months behind schedule, since it was impossible to start work without a fully functional backup solution in place. Moving the data centers from **physical servers to virtual servers** became complicated.

66

“Backup is an extremely important topic to me. It is one of the basic features of an information system. With Tina we can now secure all the university’s data.”

“Time devoted to backup admin has been optimized, and above all, we are able to adapt to the needs of academic users who create new projects.”

Bruno Guibert, Director of Information Systems, University of Savoie-Mont Blanc

THE SOLUTION

Tina was chosen for its **comprehensive technical package** and **ease of deployment**. The University took advantage of **simplified software key management** under the **Atempo Campus license**. The team was able to augment the number of secured systems, and **backup retention times** were increased from three to four weeks. With its **easy administration**, it can manage physical Windows, Linux and Solaris servers plus all virtual servers running under VMware on three physical servers with SAN storages.

Managing a single, **unified system** means Administrators are more efficient. For additional **data security** in the event of **disaster**, the backup backend storage is replicated between two university sites. Each site stores a total volume of **110 TB**. With Tina's **deduplication** engine, this stored volume was reduced to just **14 TB**, providing real savings on the storage investments.

The USBM shares infrastructure and technology with other universities in the Academy. For example, the Alfresco Enterprise Content Management software, and the Zimbra mail service with its 60,000 mailboxes, are hosted by SIMSU and **protected by Tina**.

THE BENEFITS

Tina's efficiency is demonstrated daily through simple tasks such as **restoring mailboxes or files** and for more serious incidents. For instance, several servers and workstations were hacked by the CBT-locker **Ransomware** which encrypted and locked all files. Without paying a cent in ransom payment, the IT team was able to **restore the servers and workstations in record time**.

BUSINESS BENEFITS

Budgetary
Control

Easy to install
and manage

High-performance
deduplication

POWERFUL DATA PROTECTION AND DATA MANAGEMENT SOLUTIONS - atempo.com
Atempo Headquarters | 23, Avenue Carnot, 91300 Massy, France | Tel: +33 164 868 300 | info@atempo.com

CHALLENGES

- **Control the budget** and avoid being charged by volume
- **Simplify data protection** management save time
- Protect physical and virtual servers from a **single solution**
- **Share** the solution among all university departments

SOLUTION

- **Tina** installed on two sites with deduplication and cross-replication
- A **Campus license** with access to all Tina modules for all university and laboratory servers

RESULTS

- **Fully, functional coverage** on all servers and all storages
- High **deduplication** ratio of 8 to 1
- Easy for the technical team to **install and manage**
- **Budgetary Control**
