

End-to-End Data Protection and Cyber Resilience

Secure your entire data and production environments

Defend sensitive data against cyber threats and ransomware

Control costs with a comprehensive data protection offering

Ability to manage complex on-premises and cloud environments without limits

Disaster recovery strategies. No data loss & no business disruption

Key Benefits

- Atempo combines Data **immutability**, **Air-Gap** and access **hardening** in order to mitigate cyber threats
- **Cost effective** with a all-in-one protection range offer. On-prem, Cloud, hybrid cloud
- **Avoid data loss** thanks to **advanced DR** and **business continuity** strategies
- Atempo provides **complete data protection coverage**: Endpoints, Physical & Virtual servers, Applications, Databases & Microsoft 365

Endpoints Backup

- Laptops, Desktops, Workstations and NAS
- Windows, Linux, macOS

Disaster Recovery

- Off-Site replication
- Immutable backup
- Off Line Backup
- One Click restart

Physical or Virtual Server Backup

- VMware / Windows / Linux / Nutanix / OpenStack

Microsoft 365 Backup

- Exchange / OneDrive / Sharepoint / Teams / OneNote
- Backup on Prem, Cloud, Tape
- Granular Restore

The Five Pillar Of Data Protection

DRaaS

Backup continuity with 0 data loss and 0 business disruption

Virtual Servers

Protect virtual environments with immutable backup copies

Physical servers

Protect all your physical servers and extend the data protection for your legacy systems

Apps & SaaS

Backup and restore all your apps and Microsoft 365 data Exchange, OneDrive, Sharepoint, Teams & OneNote

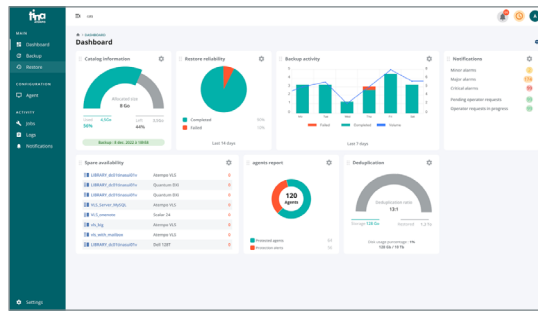

Endpoints

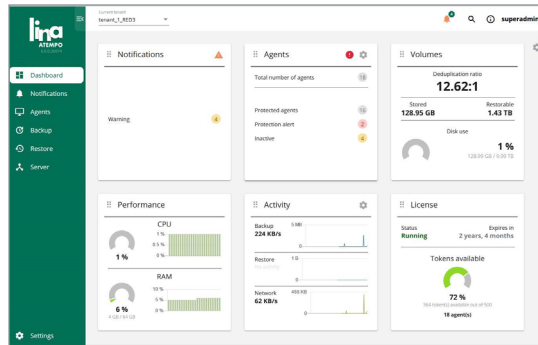

Continuous and deduplicated Data protection for all workstations. Autonomous and easy to use data restore

Sensitive Data Protection

- **Atempo does Respect the 3-2-1-1 Best Practice Solution**
Simply create on-site and offline copies with support of: Disk, Object, Tape and cloud targets
- **Immutable Backup against Ransomware**
Atempo provide combination between native encryption and immutable data to resist ransomware damages
- **Fast and Intuitive Restores**
Thanks to the Time Navigation feature you can navigate the backup tree and granularly restore what you are looking for
- **Storage cost savings with Data Deduplication**
Built in deduplication engine for storage cost savings and bandwidth optimizations
- **Completely Protect Microsoft 365** from Mail to file: Exchange, OneDrive, SharePoint, Teams & OneNote

The data protection solution for organizations with complex infrastructures. Protect Hypervisors, VM, DB, physical servers and Microsoft365. Tina is configurable solutions across a wide range of data sources and storage targets.

Continuous Data Protection for endpoints. Powered by a built in deduplication engine, Lina provide great backup performances even with slow bandwidth. Laptop on the go or desktop on site, Lina is able to backup all your data anytime, anywhere.

Atempo protects sensitive data against malicious attacks and cyber threat.
