

The Leading French Travel Group Chooses Continuity to Protect its Microsoft 365 Data

"Today, Atempo's solution is perfectly functioning, allowing us to back up our M365 data and restore it whenever necessary."

Gautier Bohuon, IT Director, Marietton Développement

THE COMPANY

Marietton Développement is a French group specializing in tourist and business travel, employing more than 1,600 people across 400 sites. With its 300 agencies and tour operators (Havas Voyages, Selectour, Auchan Voyages, Austral Lagon, Héliades, etc.), the group is positioned as a major player, offering a complete range of business and tourist travel organization services through a catalog of world-renowned brands.

THE COMPANY

Marietton deploys a system infrastructure distributed over 3 dedicated server rooms, using about 50 virtual machines to manage approximately 40 TB of data. A Continuity Premium+ appliance is dedicated to the backup and business continuity of the group's critical applications.

With the recent switch to Microsoft 365 applications, the company has extended the scope of its backup to address this shortcoming on the Microsoft side. **While Microsoft is committed to ensuring high-quality access to its cloud applications, the company has no obligation to back up stored data.**

Therefore, the IT department decided to implement Continuity M365 to ensure a complete backup solution for its Microsoft environment: Exchange, OneDrive, Sharepoint and Teams.

THE ENVIRONMENT

Technical requirements:

- Thousands of mailboxes (+4000 Exchanges Online emails)
- Millions of shared files (+11 million files on OnDrive Business)
- Large volume of data (+20 TB of data shared on Sharepoint)
- Thousands of users across a hundred remote sites

Considering the very large volume of data to be protected, an optimized configuration is imperative to ensure rapid backups and to guarantee data integrity. Also, M365-licensed users are disseminated among the company's employees throughout hundreds of remote sites. It is therefore essential to keep data centralized and stored on a single site.

«With Continuity, we have succeeded in dividing stored volumes by 3 compared to protected volumes.»

"The labels "France Cybersecurity" and "As Used by the French Armed Forces" were decisive in our choice for Atempo's solution."

"We need to back up our M365 data. However, according to its terms of contract, Microsoft claims not to be responsible for the hosted data and does not guarantee its availability."

Gautier Bohuon, IT Director, Marietton Développement

THE SOLUTION

Lack of backup coupled with jurisdiction concerns, prompted Hosteur to propose a backup and recovery solution for M365 environments. By combining its **high-performance sovereign storage offer** with the **Atempo Tina backup software solution** (developed and supported in France), Hosteur provides a unique trusted protection offer for **M365**.

Depending on the number of mailboxes to be protected and the storage volume required, Atempo and Hosteur technical experts offer customers a **turnkey solution** from platform creation to **technical architecture**, including **VMs** (Virtual Machines) specifications and support. All components are considered to ensure the smooth, transparent backup of all **Microsoft applications**. A dedicated Hosteur team handles infrastructure maintenance and upgrades.

THE RESULT

Completely **scalable**, Tina supports several thousand mailboxes, Onedrive files, shared Teams, and Sharepoint conversations. Tina's performance has already proven itself in recovering critical amounts of **data** from Hosteur's customers. Its **compatibility** with most storages, especially object storages, makes Tina a perfect tool for M365 protection.

TINA'S HIGHLIGHTS

- **Granular or full recovery:** Email, Calendar, Contacts, Tasks, OneDrive Online file, Sharepoint Online, Teams
- **End-to-end:** Data Encryption
- **Enabling Immutability:** On Target Storage
- **Compatibility with all storages:** Disk, Tape, and Cloud
- **Native Deduplication Engine:** Reduced Storage Costs

BUSINESS BENEFITS

Backup of thousands
of mailboxes

M365
Backup Automation

Proximity
and responsiveness
of Atempo teams

THE BENEFITS

- Atempo solution is labeled **"As Used by French Armed Forces"**
- **Proximity and Responsiveness** of Atempo Support teams
- Contract under **European Jurisdiction**
- **High Availability Storage** in a European Data Center
- **All-in-one offer:** Software, Storage, Support, Installation, Administration
