TINA CUSTOMER SUCCESS · CLOUD SERVICES PROVIDER

Atempo and Hosteur: Protect your Microsoft 365 Data Efficiently and Securely!

“Any email deleted after 30 days is definitely removed from the Microsoft platform.”

“Every day, people delete emails and want to restore them. As there is no backup, it is impossible to restore this deleted data.”

— LAURENT ESCART · CEO · HOSTEUR

THE COMPANY

Founded in 2003, Hosteur is a French company specializing in cloud services, with offices in Europe, North Africa and Sub-Saharan Africa.

Initially focused on data hosting with dedicated servers, Hosteur has responded to its customer’s requirements by offering high value-added services, particularly in terms of high availability in cloud, high-end SSL certificates, encrypted resilient backup, and high-performance storages.

THE CHALLENGE

With this in mind, Hosteur completes its range of services with data backup services hosted in Datacenters, all located in Europe.

The explosive growth in the use of Microsoft 365 (M365) has generated new needs for data protection. Indeed, while Microsoft’s cloud services ensure the performance of access to hosted data, there is no guarantee against its loss. Accident, crypto-virus, malicious action or human error, M365 data loss can occur and impact business. Additionally, any legal enforcement of your rights would require you to travel to the United States as Microsoft’s headquarters (as a legal entity) resides. These arguments underline why having a copy of your M365 data is essential so you can retrieve it at any time.

Today, the fast-growing company employs around 50 people, four of whom are dedicated to data backup and storage. More than 6,000 active customers, from SMBs to major CAC40 groups, use trusted services, certified by HDH (Healthcare Data Hosting), and ISO 9001 for the quality standard, ISO 14001 for the environment and ISO 27001 for the information security management system.

> "Cybersecurity is everyone's business. With more and more attacks coming our way, it's no longer a question of IF, but WHEN. Every business, regardless of size, will one day be affected by cyberattacks."
>

"Our customers want to know where their data is stored."

— LAURENT ESCART · CEO · HOSTEUR

THE SOLUTION

Sovereign storage plus Tina: a trusted M365 protection offer

Lack of backup coupled with jurisdiction concerns, prompted Hosteur to propose a backup and recovery solution for M365 environments. By combining its high-performance sovereign storage offer with the Atempo Tina backup software solution (developed and supported in France), Hosteur provides a unique trusted protection offer for M365.

Depending on the number of mailboxes to be protected and the storage volume required, Atempo and Hosteur technical experts offer customers a turnkey solution from platform creation to technical architecture, including VMs (Virtual Machines) specifications and support. All components are considered to ensure the smooth, transparent backup of all Microsoft applications. A dedicated Hosteur team handles infrastructure maintenance and upgrades.

THE RESULT

Completely scalable, Tina supports several thousand mailboxes, Onedrive files, shared Teams, and Sharepoint conversations. Tina's performance has already proven itself in recovering critical amounts of data from Hosteur's customers. Its compatibility with most storages, especially object storages, makes Tina a perfect tool for M365 protection.

TINA'S HIGHLIGHTS

- **Granular or full recovery:** Email, Calendar, Contacts, Tasks, OneDrive Online file, Sharepoint Online, Teams
- **End-to-end:** Data Encryption
- **Enabling Immutability:** On Target Storage
- **Compatibility with all storages:** Disk, Tape, and Cloud
- **Native Deduplication Engine:** Reduced Storage Costs

THE BENEFITS

- Atempo solution is labeled "As Used by French Armed Forces''
- Proximity and Responsiveness of Atempo Support teams
- Contract under European Juridiction
- High Availability Storage in a European Data Center
- All-in-one offer: Software, Storage, Support, Installation, Administration

BUSINESS BENEFITS

High availability of backed-up data

Scalability from a few dozen users to several thousand

Proximity and responsiveness of level 3 support teams

Complete Data Protection Platform

ONE SOLUTION · EVERY WORKLOAD

Endpoints
Continuous protection for laptops and workstations, on site or working remotely

Applications & SaaS
Databases, business applications and Microsoft 365 protected end to end

Virtual & Physical
Virtual machines and physical servers backed up and restored from one console

DRaaS & Legacy
Disaster recovery and long-lived legacy systems covered by the same licence
